

ROAD TO DEVCON 8 · UNIVERSITY PROGRAM APPLICATION

Introduction to Ethereum

Campus Workshop & Networking Meetup

Bringing Ethereum to the next generation of Indian students –
one campus, one community, one conversation at a time.

ORGANISED BY
HackClub SBS

INSTITUTION
**Shanti Business
School, Ahmedabad**

GRANT REQUEST
USD \$276 · INR ~23,000

SUBMITTED TO
Ethereum Foundation ESP

EVENT WINDOW
July – August 2026

1. EXECUTIVE SUMMARY

HackClub SBS is a student-led technology club based at Shanti Business School, Ahmedabad. We are applying to the Ethereum Foundation's Road to Devcon 8 India University Program to organise a fully introductory, one-day Ethereum workshop followed by a networking meetup — open to all students, recent graduates, and curious individuals in Ahmedabad, regardless of their institution or background.

Our target audience is anyone with little to no prior knowledge of blockchain. The event will cover Ethereum fundamentals, a guest speaker session from an experienced Ethereum builder, and an informal networking meetup. The total budget requested is INR 23,000, fully within the program's grant ceiling.

2. ABOUT HACKCLUB SBS

HackClub SBS is a student-run technology and innovation club based at Shanti Business School, Ahmedabad. Our mission is to bridge the gap between classroom theory and real-world emerging technologies. While we are based at SBS, our events are open to all — students from any college, recent graduates, working professionals, and anyone curious about technology are welcome.

Institution	<u>Shanti Business School</u> , Ahmedabad, Gujarat, India
Club	<u>HackClub SBS</u> — Student Technology Society
Event Open To	All students, graduates, and professionals in Ahmedabad — not limited to SBS
Contact	Twitter: @hetansh2220 , Email: hetanshsachaniya07@gmail.com
Club Focus	Emerging Technology Education: Web3, AI, and Open Source

3. WHY THIS EVENT — MOTIVATION

Ahmedabad is a growing tech and business hub with a large student population spread across many institutions. Yet most students — regardless of where they study — have never had a structured, welcoming introduction to Ethereum or blockchain beyond surface-level news coverage. The key gaps we want to address:

- Students are aware of crypto but don't understand what Ethereum actually does as a technology platform
- Students across streams lack exposure to Web3 development pathways that are increasingly in demand
- Business and tech students don't see the economic and governance dimensions of decentralised systems
- Devcon 8 is happening in Mumbai, just hours away — this is a once-in-a-generation opportunity for Indian students

4. EVENT DESIGN & AGENDA

The event is a single-day program designed to fit within a college schedule. Total duration: approximately 2.5 to 3 hours.

DURATION	SESSION	FORMAT	DETAILS
20 min	Welcome & Introduction	Presentation	HackClub SBS intro, overview of Devcon 8 Mumbai, why Ethereum matters
30 min	What is Ethereum?	Lecture + Q&A	Blockchain basics, decentralisation, real-world relevance for all streams
40 min	Guest Speaker Session	Talk + AMA	Experienced Ethereum developer / industry builder shares their journey
30 min	Ethereum in the Real World	Discussion	DeFi, DAOs, NFTs, Layer 2s — real use cases and career opportunities in Web3
20 min	Career Paths in Web3	Discussion	Opportunities for tech and business students in the Ethereum ecosystem
20 min	Q&A + Networking Meetup	Open	Open discussion, Devcon ticket info, informal 1:1 networking

Guest Speaker

We will invite an experienced Ethereum developer or Web3 founder from the Indian ecosystem. The speaker will share their personal journey into Ethereum, what they're building, and what pathways exist for students today. The session will include an open AMA. We are actively reaching out to the Ethereum India community and will confirm the speaker prior to the event date.

Networking Meetup

The formal sessions close with an open informal meetup. Students can speak directly with the guest speaker, connect with peers interested in Web3, and learn about Devcon 8 scholarship and ticket opportunities.

5. TARGET AUDIENCE & EXPECTED REACH

Primary Audience	Students from any college or university in Ahmedabad and nearby areas
Secondary Audience	Recent graduates, working professionals, and faculty curious about Ethereum and Web3
Expected Attendance	50–100 attendees; no prior blockchain knowledge required
Promotion Plan	College notice boards across institutions, WhatsApp groups, LinkedIn, and HackClub SBS social media
Inclusivity	Fully introductory — designed for first-time learners regardless of stream, background, or institution

6. ALIGNMENT WITH ETHEREUM FOUNDATION PROGRAM GOALS

- **Introduce Ethereum to new audiences:** By opening the event to all students and professionals in Ahmedabad — not just one institution — we maximise reach and bring Ethereum to a genuinely diverse audience.
- **Build pathways to Devcon 8:** Devcon 8 is in Mumbai this November. We will actively inform and encourage top participants to apply for scholarships and attend.
- **Long-term community building:** This workshop is designed to seed a permanent Web3/Ethereum community in Ahmedabad — starting with a student club and growing into recurring cross-college events.
- **Strengthen the India developer pipeline:** Ahmedabad is a growing tech hub. Reaching students across multiple institutions here strengthens the grassroots Indian Ethereum ecosystem.
- **Multi-dimensional exploration:** By welcoming students from tech, business, design, and beyond, we engage Ethereum's economic, governance, and social dimensions — not just the technical ones.

7. BUDGET BREAKDOWN

ITEM	DETAILS	EST. COST (INR)	FUNDED BY
Refreshments	Snacks & beverages for 50–100 attendees	8,000	EF Grant
Printed Materials	Handouts, banners, Ethereum cheat sheets	4,000	EF Grant
Speaker Logistics	Travel reimbursement + token honorarium	6,000	EF Grant
Event Promotion	Social media creatives, print posters	3,000	EF Grant
Miscellaneous	Last-minute or unforeseen expenses	2,000	EF Grant
Venue / AV	Seminar hall + projector (college infrastructure)	—	College Support
TOTAL		23,000	Primarily EF Grant

Total grant requested: INR ~23,000 — within the program's USD \$300 ceiling. Venue and AV infrastructure will be provided by Shanti Business School at no additional cost. The HackClub SBS team is volunteering all organisational labour.

8. PROJECT TIMELINE

The event will take place between May and October 2026 in compliance with the program's event window (15 May – 15 October 2026).

PHASE	MILESTONE
Week 1–2	Grant approval received · Confirm venue date with management · Begin speaker outreach
Week 3	Confirm guest speaker · Design event materials, banners, and handouts
Week 4	Open registrations · Promote via college channels and social media
Week 5	Finalise headcount · Purchase refreshments · Print all materials
Week 6	EVENT DAY — Workshop + Guest Speaker AMA + Networking Meetup
Week 7	Post-event survey · Impact report with photos and data submitted to EF ESP

9. SUCCESS METRICS & REPORTING

Attendance Target	Minimum 50 attendees; target 80–100 from across Ahmedabad's colleges and institutions
Engagement	Active participation during guest speaker AMA and Q&A sessions
Feedback Score	Post-event survey targeting an average satisfaction score of 4/5 or above
Devcon Pathways	Track how many attendees express interest in applying for Devcon 8 scholarship/tickets
Community Seeding	Formation of a Web3/Ethereum student community in Ahmedabad post-event
EF Deliverable	Post-event impact report with photos, attendance data, and learnings — submitted within 2 weeks of event

10. EXPECTED DELIVERABLES

Upon completion of the event, HackClub SBS will provide the Ethereum Foundation with the following deliverables:

PHASE	MILESTONE
Post-Event Impact Report	A comprehensive written report covering event overview, key learnings, challenges, outcomes, and recommendations — submitted to EF ESP within 2 weeks of the event.
Attendance Data	Full attendance record including number of registrations, walk-ins, and final headcount, broken down by institution where possible.
Feedback Survey Results	Anonymised post-event survey responses with aggregate satisfaction scores, qualitative feedback, and suggestions from attendees.
Event Photos	A curated set of high-quality photos from the workshop, speaker session, and networking meetup shared with the Ethereum Foundation for use in their communications.
Social Media Coverage	Documentation of event promotion and post-event coverage across HackClub SBS social media channels, including reach and engagement metrics.
EF Summary Submission	A concise summary of the event — including highlights, impact, and next steps — submitted to the EF ESP within 2 weeks of the event date.

11. CLOSING STATEMENT

Devcon 8 is coming to Mumbai — India's backyard — this November 2026. For students across Ahmedabad, this is a rare and remarkable proximity to one of the world's most important technology conferences. But proximity alone isn't enough; students need a structured, welcoming first encounter with Ethereum to be inspired to go further.

HackClub SBS is building that first encounter — not just for one college, but for the broader Ahmedabad student community. We are not asking attendees to become developers overnight — we are asking them to spend three hours understanding why Ethereum exists, what it enables, and what role they could play in it. That is enough to change the trajectory of a student's career.

With the Ethereum Foundation's support, we will give Ahmedabad its first real community taste of Ethereum — and send some of those students on a path to Devcon 8 and beyond.
